

# ARCADE: FREE Racing Car

Hello, first of all, I want to thank you for downloading this asset. Secondly, I let you know that you are able to use this model in commercial and non-commercial projects. No attribution is required. These are some important details of the asset:

- All cars share the same materials. There are 2 materials per car. One if for the body, and the another is for lights.
- For mobile games, I recommend to disable realtime shadows, and use either baked or 'fake' shadows instead.

With nothing more to say at the moment, I appreciate your time by reading this file.

If you are interested in more vehicle models, I will share you a little description of other assets I have available on the Unity Asset Store.

Best regards, MENA Games.
